NAVAIR INSTRUCTION 3880.2A

From: Commander, Naval Air Systems Command

Subj: INTELLIGENCE SUPPORT PROGRAM

Ref: (a) NAVMATINST 3880.1C (NOTAL)
(b) NAVINTCOMINST 5540.1
(c) OPNAVINST 3811.1B

1. Purpose. To provide policy and guidance in the acquisition and use of intelligence support for weapon systems, from the selection and planning process through operational employment.
2. Cancellation. This instruction supersedes NAVAIR Instruction 3880.2 of 27 May 1980. (A)
3. Scope. This intelligence support encompasses all areas involving intelligence requirements and considerations, and the flow of information between the intelligence community and the command.
4. Background
 - a. The ever-increasing complexity and cost of modern naval weapon systems concept, design, research, development, test, evaluation, procurement, installation, maintenance, and modification make it imperative that accurate and timely intelligence and threat assessment be applied throughout the life cycle of those systems. Among the areas of intelligence interest are scientific and technological developments as they relate to projected enemy military capabilities, intelligence analyses that address current enemy capabilities, doctrine and procedures observed in weapon system employment, and an understanding of U.S. and allied intelligence programs which are capable of providing information in support of specific programs and projects.
 - b. In order to facilitate the flow of this intelligence information and strengthen the interface between the intelligence community and the naval systems commands, laboratories and field activities, the Scientific and Technical Intelligence Liaison Officer (STILO) program was established by reference (a). The STILO is the primary point of contact for acquiring intelligence support within the systems commands, laboratories and field activities. Additionally, a Deputy Intelligence Liaison Officer (DILO) will be designated by each program manager or program coordinator on a collateral basis to act as primary interface with the STILO for coordinating intelligence requirements. (R)
5. Policy. For each weapon systems program, specific planning will be included for obtaining and utilizing intelligence support throughout the life cycle of that program.

6. Responsibilities

a. The STILO (AIR-93I) is responsible for the coordination of the intelligence support program within the Naval Air Systems Command Headquarters and will

(1) maintain a broad overview of command activities to ensure appropriate intelligence support is made available and that action is taken to fill any intelligence "gaps";

(2) keep the commander, vice commander, deputy commander, deputy commander for operations and appropriate assistant commanders, program managers and program coordinators informed of pertinent threat intelligence and technological developments which impact on their mission and assigned projects;

(3) maintain a file of intelligence requirements pertaining to command programs and projects;

(4) ensure the review of proposed technical approaches, proposed technical development plans and other research and development preparatory documentation for appropriate and adequate consideration of intelligence information;

(5) coordinate command requirements for Sensitive Compartmented Information (SCI) including management of Navy, civilian and contractor compartmented intelligence billets;

(6) ensure appropriate command personnel are aware of and utilize proper arrangements for contracts involving SCI per reference (b);

(7) provide guidance and assistance to command personnel in the establishment of extremely sensitive programs;

(8) assist command contract monitors in identifying requirements for contractor access to intelligence data. Once validated as a legitimate requirement, provide the required intelligence data to the contract monitor for final review and subsequent transfer to the contractor;

(9) coordinate the submission of Intelligence Production Requests and Statements of Intelligence Interest;

(10) coordinate the early phases of Foreign Material Exploitation (FME) and act as triservice FME coordinator for the command;

(11) obtain command technical expertise when requested by the intelligence community;

(12) maintain a scientific and technical intelligence reference library and research capability;

4782

2

2

(13) disseminate current intelligence updates and provide briefings on subjects of interest to the command;

(14) represent the command at scientific and technical intelligence conferences; and

(15) maintain liaison with the STILO's of other commands, centers and laboratories.

b. The DILO is responsible for the coordination of intelligence requirements within a specific program or project and will

(1) provide the necessary interface with the command STILO in intelligence related matters;

(2) provide the STILO with intelligence requirements; and

(3) advise the STILO of ongoing and projected projects in sufficient detail to allow adequate intelligence support.

7. Action

a. The Scientific and Technical Intelligence Liaison Officer (AIR-93I) is designated the command focal point for intelligence and intelligence related activity. Requests for intelligence and formal liaison involving intelligence commands will be coordinated through the STILO. (R)

b. Requests for threat support will be coordinated with and submitted by the STILO per references (a) and (c).

c. In order to ensure that intelligence requirements are properly addressed and supported, the STILO will be appraised of all command programs requiring intelligence support.

d. A DILO will be designated by each program manager or program coordinator on a collateral basis to internally coordinate intelligence requirements and act as primary interface with the STILO in the resolution of these requirements.
